The abolish-ment of the system has obtained a down place in the minds of many of all classes in the State, tained himself in that manner. When this ocand is especially favored by working men. It is to be hoped that the suggestion of the correspondent of the American is but the beginning of a great reform in one of the most important of the Southern States; and that Maryland, Delaware, Kentucky and Missouri will ere long adopt some system of emancipation such as the true interests of the white as well as black men of those commonwealths demand. They have only to get rid of the incubus of slavery to keep their free neighbors on the North.
